Program

Welcome Message

Dear professors, colleagues and young generations of Vascular specialties

It is a deep pleasure to invite you to attend and participate in 11th VSE Annual meeting in Cairo . In addition to recent topics in our field ,we also have the chance to look at « the future » ,Regenerative Techniques in the Field of Vascular Surgery. It is a chance for learning, mutual exchange of skills and experiences. VSE concentrates on young generations for safety practice and research. We welcome all national and international participants and speakers. Wish you a good stay and scientific program in the 11th VSE Conference.

daflon[®] 500mg

Micronized purified flavonoid fraction

A micronized form
and a comprehensive mode
of action for better clinical efficacy

N°1
phlebotropic drug
worldwide

Presentation and composition: Micronized, purified flavonoid fraction 500 mg; diosmin 450 mg; hesperidin 50 mg. **Therapeutic properties:** Vascular protector and venotonic. Daflon 500 mg acts on the return venous system: it reduces venous distensibility and venous stasis; in the microcirculation, it normalizes capillary permeability and reinforces capillary resistance. **Pharmacokinetics:** Micronization of Daflon 500 mg increases its gastrointestinal absorption compared with nonmicronized diosmin (primary excretion 57.9% vs 32.7%). **Therapeutic indications:** Treatment of organic and idiopathic chronic venous insufficiency of the lower limbs with the following symptoms: heavy legs, pain, nocturnal cramps. Treatment of hemorrhoids and acute hemorrhoidal attacks. **Side effects:** Some cases of minor gastrointestinal and autonomic disorders have been reported, but these never required cessation of treatment. **Drug interactions:** None. **Precautions:** Pregnancy: experimental studies in animals have not demonstrated any teratogenic effects, and no harmful effects have been reported in man to date. Lactose: in the absence of data concerning the diffusion into breast milk, breast-feeding is not recommended during treatment. **Contraindications:** None. **Dosage and administration:** In venous disease: 2 tablets daily. In acute hemorrhoidal attacks: the dosage can be increased to up to 6 tablets daily. As prescribing information may vary from country to country, please refer to the complete data sheet supplied in your country.

A detailed view of the Epic™ Self-Expanding Nitinol Vascular Stent with Delivery System. The device consists of a long, thin, dark green catheter that curves upwards. At the end of the catheter is a white, cylindrical delivery sheath with a yellow band near the tip. The stent itself is a mesh of interlocking diamond-shaped cells, partially expanded and protruding from the sheath. The background is a vibrant red with a white curved border at the top and bottom.
