Welcome Message

On behalf of the EGAA Organizing Committee, it is our honor to announce the 9th EGAA annual International Scientific Congress 2021.

This year's program carries outstanding preparations and exceptional collaboration with eminent speakers from different Egyptian Universities as well as Professors from major orthopedic centers in Different Countries.

It is our pleasure to declare that the conference comprises lectures given by 53 national speakers and 17 Guest speakers, symposia and hands-on arthroscopy and shoulder arthroplasty workshops.

Last but not least, due to the present situation of COVID 19, we encourage our participants to stay safe and maintain social distance.

Hope to have a fruitful convention and a rewarding scientific program

Ahmed Abdel Aziz

Adnan Saithna

Orthopedic Surgeon Specializing in Arthroscopic and Minimally Invasive
Knee and Shoulder Surgery

Alessandro Castagna

Full professor of orthopedics, Humanitas University
Chief of the shoulder unit of Humanitas Reasearch Hospital Milan, Italy

Amir Takla

Physiotherapy, Adjunct A/prof Swinburne university , The University of
Melbourne , Australia

Andreas Imhoff

Professor of orthopedic surgery and traumtaology, director department of
orthopedic sports medicine
Hospital Recht der Isar - University of Munich

Aravind Athivaram

A specialist in Orthopedic Sports Medicine
Associate Professor of Orthopedic Surgery, Chicago University

Christoph Becher

ATOS Hospital for special surgery Heidelberg, Germany

International Guest Speakers

Gernot Felmet

Director ARTICO sport clinic (Germany).
Past president of the European federation of national societies of
orthopedics and sports traumatology

Hajo Therman

Medical director of Hip-Knee and Foot Surgery
Taos clinic, Heidelberg, (Germany)

Kevin Plancher

Clinical Professor Albert Einstein College of Medicine

Kristoffer Barfod

Senior Researcher, Consultant Surgeon, PhD MD

Lukas Weiskopf

Specialist in Orthopedic Surgery and Sports Medicine SEMS, Switzerland

Michael Morcos

BPhysio APAM, Australian Sports Physiotherapy, Australia

Interntaional Guest Speakers

Nuno Gomes

Clinical Director of Orthopaedics ta the Military Hospital in Porto, Portugal,
Vice-Chairman of European Shoulder Associtaes of ESSKA

Oliver Marin Pena

Spain, Consultant Hip Preservtaion, Infanta Leonor Hospital , Madrid, Spain

Olivier Verbogert

The Next Generation in Tensionable Knotless Technology

Bankart instability
simple stitch repair with
Knotless FiberTak® anchors

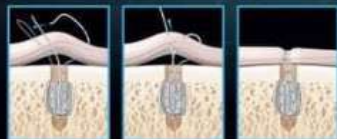

Upper border subscapularis
mattress stitch repair with
knotless tensionable anchors

Lateral epicondylar reverse
figure-eight stitch repair with one
knotless tensionable anchor

Just Pass It, Cinch It, Cut It

Knotless repairs save
time compared to knotted
repairs¹ and eliminate the
risk of knot impingement
and migration.

GRYPHON® BR

INSTABILITY ANCHORS

The Confidence of Proven Strength¹

Size and Flexibility: when the anchoring location is tight on space but the pull-out strength can't be compromised, call on the smaller sized anchor comprised of BIOCRYL® RAPIDE – the #2mm anchor with biocomposite material providing optimal strength.

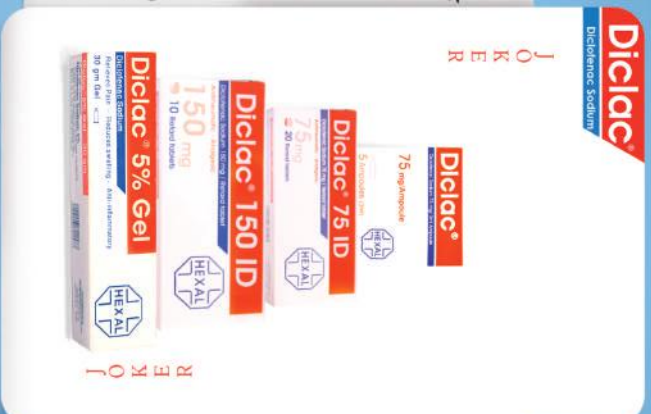

GRYPHON® Suture Anchors

The GRYPHON "P" (Push-in) BR Anchor offers a barbed design with ease of insertion and provides greater than 25% pull-out strength versus the competitor.

INDICATED IN ADULTS AND

IN CHILDREN FROM BIRTH*

TARGOCID
Powder for 200, 400 mg
preparation of injection/infusion
or oral solution **SANOFI**

In patients with kidney problems, dose usually need to be lowered after the 4th day of treatment as follows:
Mild and moderate kidney problems: the maintenance dose will be given every two days, or half of the maintenance dose will be given once a day;
Severe kidney problems or on haemodialysis: the maintenance dose will be given every three days, or one-third of the maintenance dose will be given once a day.

*Targocid is used for:

adults and children (including newborn babies) to treat bacterial infections of the skin and soft tissue, bones and joints, lungs, urinary tract, heart, abdominal wall and blood.

IM: Intramuscular; IV: intravenous; CrCl: creatinine clearance.

#It will be given by injection into a vein (intravenous use) or muscle (intramuscular use). It can also be given as an infusion through a drip into a vein.
